I want to change the int value from my sensor to 0 when the button is pressed. I.e. I want to use int sensor as a variable which value will change with the sensor value. I.e. I want to get the sensor value (in int value) in my program. How to do it? Does i need to use if Statement? I have created a loop, so I would like to use it in the loop. Can someone explain me how to do it? A: Assuming the sensor you are talking about is an analog input: First read the value of the analog input: float value; bool state_change = digitalRead(sensor) == HIGH; do { value = analogRead(sensor); } while(state_change == true); Then detect the button press if (digitalRead(button) == LOW) { // the button has been pressed int buttonValue = 0; for (int i = 0; i < 10; i++) { Addition of thoracic radiotherapy after induction chemotherapy for clinical stage III non-small cell lung cancer. As the standard treatment for Stage III non-small cell lung cancer (NSCLC), induction chemotherapy followed by a consolidation regimen with concomitant thoracic radiotherapy has been reported to improve the survival rate for these patients. However, the optimal timing of radiotherapy after induction chemotherapy remains controversial. We retrospectively evaluated whether the addition of consolidation thoracic radiotherapy increases the survival benefits of a consolidation regimen with docetaxel and cisplatin for Stage III NSCLC patients after induction chemotherapy. We selected 110 patients with clinical Stage III NSCLC from among the clinical patients diagnosed in our hospital during the period from January 2001 to December 2005. Our consolidation regimen consisted of docetaxel and cisplatin administered for 4 cycles; the scheduled consolidation thoracic radiation was delivered 2 weeks after the completion of the consolidation regimen. The survival analysis was performed by the Kaplan-Meier method, and the log-rank test was used to compare the survival rate of patients who received radiation therapy (RT) after completion of induction chemotherapy (Group A; n = 47) and those who received radiotherapy before induction chemotherapy (n = 63).
